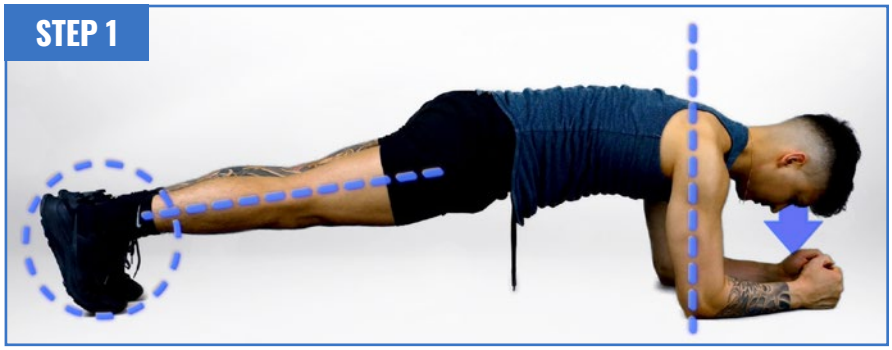
RKC PLANK

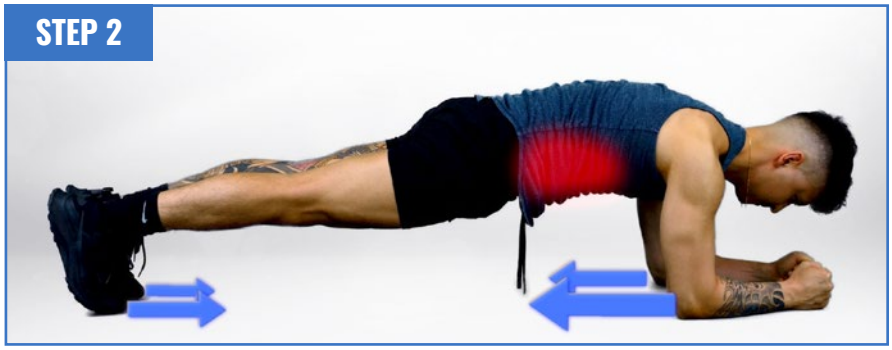
STEP 1: SETUP

Get into a plank position with your elbows under your shoulders, legs straight, feet together, and head facing down. Your body should make a straight line.

STEP 2

While maintaining a plank position, contract your abs and squeeze your glutes hard Then pull your elbows down against the floor while pulling your toes up towards your head. Your elbows and toes won't move, but pull them against the floor as if you were trying to slide them together. Continue holding this position for the designated amount of time.





ADDITIONAL TIPS

To increase the difficulty, in the starting position, move your elbows up towards the level of your head and repeat the same sequence we just went through.
